AWS migration options

WAYS TO APPROACH YOUR MIGRATION AND MODERNIZATION JOURNEY

Block and file options for VMware migrations

Mapping your VMware workloads to Amazon FSx

SMB (file) access, ease of deployment

NFS (file) access, high performance, rich data management features

NVMe/TCP, iSCSI (block) and NFS, SMB (file) access, richest data management features

Amazon FSx
for Windows File Server

Amazon FSx
for OpenZFS

Amazon FSx
for NetApp ONTAP

Tools and services to support migration to AWS

AWS Application Migration Service (MGN)

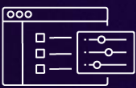

- Migrate applications to AWS with or without changes to applications or workflows
- AWS MGN automates migration of VMware-based VMs to AWS

AWS Migration Hub

- Discover your existing VMware-based environment
- Analyze application components and infrastructure
- Group resources into applications

Migration Hub Journeys

Predefined expert approved migration templates

Prescriptive guidance and migration related tooling

Collaboration across partners, practitioners, and customers

Single pane of glass to track migrations

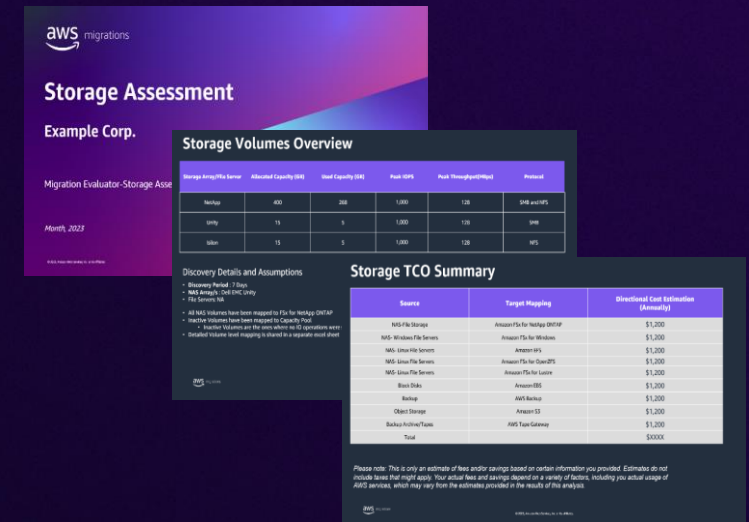

Request an AWS Storage Assessment

Discovery

Analysis

Business
case

- Automate storage discovery through our agentless collection options
- Receive data-driven mappings of File (NFS/SMB), Block, and Object storage workloads to target AWS storage services
- Receive an estimated annual cost for hosting your on-premises storage volumes at AWS
- Identify inactive storage volumes to retire or archive
- Receive detailed output at a Server/VM, Volume, and LUN level to expedite migration planning

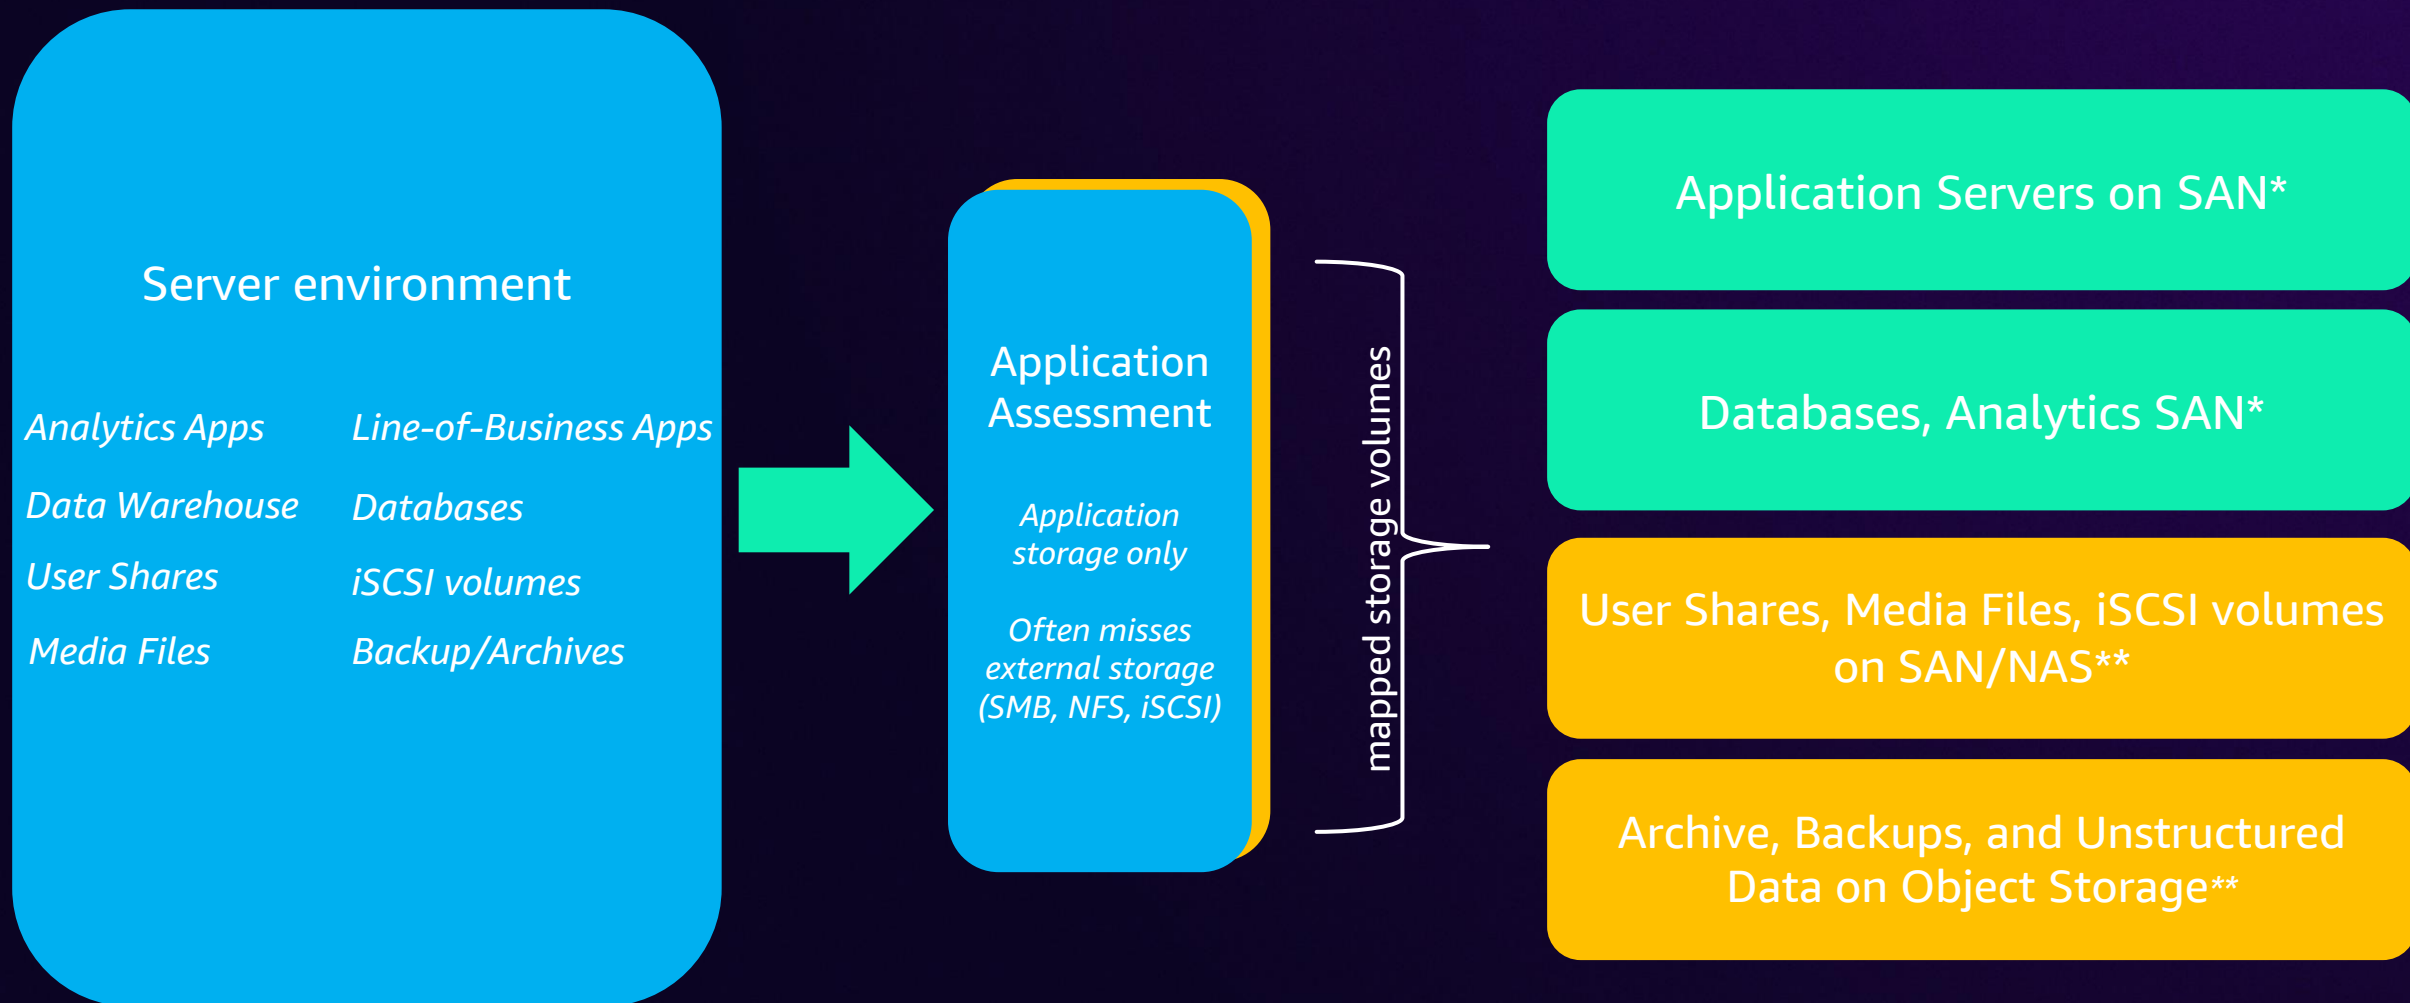

Scan the QR code and include *Storage Assessment*** after your company name**

Why an AWS Storage Assessment

OLA assessment catches **attached storage**, but not **detached storage (~80% of on-prem data)**

**Some data assessed through OLA/App assessment. Many enterprise features like replication, cloning, and storage efficiency only found on Amazon FSx (not included in OLA assessment)*

*** only assessed through a Storage Assessment)*

Q&A

Recap

- What are the things I should consider?
- What are my migration options?
- How do I choose the right storage platform?
- Who's responsible for each step in my journey?
- Should I do a storage assessment?
- What, if any, partner tools should I use?

Thank you!
